Introducing EVAPCO's Global Sustainability Directive

During the global sales conference in September 2010, EVAPCO enhanced the corporate logo with an Oak Leaf, symbolizing our commitment to the environment and the promotion of sustainable products and processes worldwide.

EVAPCO extends this commitment, placing words into action with our "Global Sustainability Directive". This directive will drive EVAPCO product innovations and operations now and in the future.

Present this directive to consulting engineers, owners, suppliers and colleagues to confirm EVAPCO's strong commitment to the environment.

The Global Sustainability Directive can be found on www.evapco.com under the Sustainability section.

The Green Revolution has begun!

Best regards,

A handwritten signature in black ink that reads "Daryn S. Cline".

Daryn S. Cline

Director, Environmental Technologies

Global Sustainability Directive

“EVAPCO has become a leading global provider of heat transfer products and services by combining our financial strength with extensive engineering and manufacturing capability. This unique position gives us the confidence to heavily invest in our many business units around the globe, with an eye towards environmentally sustainable products and technologies. EVAPCO’s ongoing investment takes the form of large Research and Development expenditures and unparalleled global manufacturing capabilities.”

Mr. Bill Bartley, President & CEO of EVAPCO, Inc.

EVAPCO, a global research, development and manufacturing powerhouse of heat transfer products and services, sets the standard for leadership through innovation. A trendsetting company committed to product quality, EVAPCO has a paramount focus on developing sustainable products and technologies. We are at the forefront of introducing products that eliminate chemicals from the environment, reduce greenhouse gases, save water and reduce sound emissions.

EVAPCO will strive to provide new products which sustain our environment, leading the industry with a directive to develop and manufacture innovative and environmentally friendly solutions. EVAPCO is committed to:

- **Develop environmentally friendly solutions for the Commercial HVAC, District Energy, Industrial Process, Industrial Refrigeration and Power markets.**
- **Help direct the consulting engineering community to these environmentally friendly solutions utilizing EVAPCO products.**
- **Assist our customers by informing them of how EVAPCO products will contribute to their environmental rating standards.**

EVAPCO is committed to reducing *our* impact on the environment throughout our global operations and will therefore:

- 1) Reduce energy and energy costs expended to develop, produce and sell our products.
- 2) Integrate renewable energy sources into our power supply.
- 3) Reduce greenhouse gas emissions.
- 4) Reduce the release of volatile organic compounds.
- 5) Improve the quality of the indoor environment.
- 6) Reduce potable water consumption and implement reclaimed water strategies.
- 7) Reduce scrap by utilizing the latest manufacturing technologies that optimize material usage resulting in precise and efficient product fabrication.
- 8) Reduce and recycle waste to diminish our burden on local landfills.
- 9) Implement a sustainable purchasing policy.
- 10) Follow sustainable exhibition guidelines globally for all trade shows.

EVAPCO will continue to provide sustainable solutions for our global markets and reduce our impact on the environment to...

“meet the needs of the present without compromising the ability of future generations to meet their own needs”

Gro Harlem Brundtland Oslo, 20 March 1987
